SUMMARY

Senior Full Stack Engineer with 10+ years architecting and scaling production Ruby on Rails applications. Built systems serving thousands of daily users and processing \$5K+ in daily Stripe transactions. Experienced taking products from zero to production across payments, e-commerce, and real-time platforms, working directly with clients, designers, and teams of up to 12 people.

EXPERIENCE

Senior Full Stack Developer

Remote, Argentina

OHZI Interactive

2019-Present

- Architected production Ruby on Rails APIs with real-time WebSocket layers serving thousands of daily users, including a holiday e-commerce platform processing \$5K+ in daily Stripe transactions
- Shipped multiple products from zero to production, including a video compressor published on the Mac App Store and full-stack web platforms backed by PostgreSQL, Redis, and Sidekiq
- Built an in-house JavaScript framework for high-performance interactive web experiences, adopted across multiple client projects.
- Created internal automation tooling that streamlined development workflows for a 12-person team and shortened delivery cycles
- Owned client-facing technical communication: led daily standups, translated business requirements into architecture decisions, and partnered with designers to ship polished UX

Full Stack Developer

Remote, Argentina

Weblinc Commerce

2016-2019

- Owned features end-to-end across PostgreSQL data modeling, Rails API development, and AWS deployment as part of a fully remote Scrum team distributed across multiple time zones
- Delivered 4 e-commerce solutions on Ruby on Rails, including custom Shopify integrations and reusable Rails gems for high-traffic stores
- Drove code review practices and architecture conventions that kept the distributed team aligned on quality

Full Stack Developer

La Plata, Argentina

Fluxit

2015-2016

- Designed and built Rails monolith applications from scratch — PostgreSQL data modeling, RESTful API design, and Heroku deployment — for internal client workflow systems
- Delivered features in 2-week Scrum sprints, contributing to architecture decisions and writing maintainable code following OOP and MVC conventions

SKILLS

Skills: Ruby, JavaScript, TypeScript, SQL, Ruby on Rails, React.js, Next.js, AWS, Docker, PostgreSQL, Redis, Sidekiq, WebSockets, REST, GraphQL, RSpec, TDD, Design Patterns, OOP, MVC, Code Review, Scrum

PROJECTS

- **respuestosgonnetsa.com.ar** — Production Ruby on Rails e-commerce platform built with full RSpec test coverage, service objects, and design patterns
- **compress.mov** — Desktop app built with Electron and FFmpeg to compress any kind of videos
- **bdcake.com** — Birthday celebration web application built end-to-end with Ruby on Rails

EDUCATION

National University of La Plata, Argentina

2011-2018

Software Engineering
