ABOUT ME

I'm a product-minded Full Stack Developer with experience building and scaling web applications. I've led development efforts while working closely with clients and teams, combining strong technical execution with a focus on real-world impact. I thrive in fast-paced, high-expectation environments and enjoy taking products from early stages to production-ready systems.

EXPERIENCE

Full Stack Developer

OHZI Interactive

Remote, Argentina

2019-Present

- Architected and maintained production-ready Ruby on Rails APIs with real-time WebSocket layers, powering client-facing products and full applications shipped from zero to production, including a holiday platform with Stripe integration and a video compressor published on the Mac App Store.
- Developed an in-house JavaScript framework for performant interactive web experiences, and built internal automation tooling that streamlined development workflows across the team.
- Led daily standups with clients, translating business requirements into technical execution and collaborating closely with designers to ship polished user experiences.

Full Stack Developer

Weblinc Commerce

Remote, Argentina

2016-2019

- Worked in a fully remote Scrum team across multiple time zones, owning features end-to-end from database design through deployment on AWS, while contributing to shared codebases and code review practices that kept the distributed team aligned.
- Delivered multiple e-commerce solutions on Ruby on Rails, building custom Shopify integrations and gems to meet specific store requirements.

Full Stack Developer

Fluxit

La Plata, Argentina

2015-2016

- Designed and built Rails monolith applications from scratch to manage internal client workflows, including database modeling with PostgreSQL, RESTful API design, and deployment to Heroku.
- Delivered features within 2-week Scrum sprints, contributing to architecture decisions and writing maintainable, well-structured code following OOP and MVC conventions.

SKILLS

Skills: Ruby, JavaScript, TypeScript, Ruby on Rails, React.js, AWS

PROJECTS

Built and launched independent products including an e-commerce platform (repuestosgonnetsa.com.ar) on Rails with full RSpec coverage, service objects, and design patterns; a birthday celebration app (bdaycake.com); and an interactive tennis experience (hill.ohzi.io).

EDUCATION

National University of La Plata, Argentina

Software Engineering

2011-2018
